Scenario)

(S) Add new Product into Application

(F) Product feature

The screenshot displays the nopCommerce administration interface for adding a new product. The sidebar on the left contains a search bar and a list of navigation items: Dashboard, Catalog, Products (selected), Categories, Manufacturers, Product reviews, Product tags, Attributes, Sales, Customers, Promotions, Content management, and Configuration. The main header area includes the user name 'John Smith', a 'Logout' button, and a 'Settings' toggle. The page title is 'Add a new product' with a link to 'back to product list'. Below the title are 'Advanced' and 'Settings' tabs. The 'Product info' section contains three main input areas: 'Product name' (a single-line text field), 'Short description' (a multi-line text area), and 'Full description' (a rich text editor with a toolbar including options like File, Edit, View, Insert, Format, Tools, and Table). The 'Full description' field is currently empty and shows a 'P' at the bottom left and 'POWERED BY TINY' at the bottom right. At the top right of the main content area, there are 'Save' and 'Save and Continue Edit' buttons.
